Niven Liyanage

Junior Game Developer | Computing Undergraduate

nivenasmitha345@gmail.com +94 77 111 2852 Maharagama, Colombo, Sri Lanka

github.com LinkedIn-Niven Asmitha

SUMMARY

Junior Game Developer at Sea Pony Studios and Computing undergraduate specializing in Information Systems, with hands-on experience in Roblox game development, full-stack applications, IoT, and database systems. Skilled in Roblox Studio, Luau, React, Django, PHP, Java, PostgreSQL, and MySQL. Former President of the LNBTI Robotics Club, with demonstrated leadership, teamwork, and user-focused development experience.

EDUCATION

BSc Hons in Computing (Information Systems) 01/2023 – Present
Lanka Nippon BizTech Institute(LNBTI)

Degree offered by: University of Greenwich (UK)

Diploma In IT, ICBT Campus 03/2022 – 12/2022
Passed with Merit

Diploma In English, ICBT Campus 03/2022 – 12/2022
Passed with Merit

EXPERIENCE

Junior Game Developer, Sea pony Studios 02/2026 – Present

Intern Game Developer, Sea Pony Studios 02/2026 – 08/2026

Robotic Club President, LNBTI Campus 03/2025 – 05/2026

Robotic Club Secretary, LNBTI Campus 03/2024 – 03/2025

PROJECTS

Ceylon DryWay – Tourist-Friendly Facility Discovery Platform
Developed a full-stack platform that helps tourists and local users discover verified dry-toilet facilities across Sri Lanka, while enabling property owners to submit listings and authorized reviewers to manage approvals and quality reports.
Live Demo: https://www.comfortgo.lk
Tech Stack: Next.js, React, TypeScript, NestJS, PostgreSQL/PostGIS, Tailwind CSS, REST APIs, JWT Authentication

Coco Connect

Developed a full-stack blockchain platform connecting coconut industry stakeholders with transparent supply chain tracking and secure transactions.

Tech Stack: React, Django, PostgreSQL, Blockchain, Tailwind CSS, Axios (integrated with backend REST APIs)

Fit4All Roblox Game

Developed Fit4All, an interactive fitness-themed game in Roblox, featuring engaging gameplay mechanics, responsive user interfaces, player progression, and persistent data storage.

LiveDemo:https://www.roblox.com/sharecode=85c6585c1f4d394da416be23e774ad58&type=Experience Details&stamp=1790836727706

Tech Stack: Roblox Studio, Luau, Roblox API, DataStoreService,GUI Development, 3D Environment Design

Motor Service & Vehicle Management System

Built a full-stack vehicle service management system to manage customers, vehicles, appointments, repairs, and service updates. Added automatic email notifications for appointment confirmations and service progress.

Live Demo: https://www.csmotorsservice.lk

Tech Stack: React, NestJS, PostgreSQL, Railway, REST APIs, Email Notification Service

Automated tank water control

Developed an Arduino-based Smart Water Filling System to detect tank levels, automate pump filling, and safely control a 230V AC pump using a relay.

Tech Stack: Arduino, Ultrasonic Sensors, LCD Display, Relay Module (230V AC Control)

Salon Management and POS System

Built a Java-based Salon Management and POS system with MySQL to manage bookings, services, billing, and inventory through a user-friendly interface.

Tech Stack: Java (NetBeans), MySQL, Swing UI, JDBC

RESEARCH PROJECT

Neuro Calm

Neuro Calm is an embedded system that detects stress levels using sensors and provides real-time calming feedback. It analyzes stress patterns using a microcontroller and delivers frequency-based relaxation signals to help reduce stress quickly and safely.

Tech Stack: ESP32, Web Interface (HTML/JS), Heart-Rate Sensor, LCD Display, Wi-Fi Control.

CERTIFICATION

Microsoft Azure AI Essentials – Professional Certificate

Microsoft Azure AI Essentials Certificate — Completed training in Azure AI fundamentals and basic machine learning concepts, including AI workloads, model basics, and responsible AI.

- Credential URL: https://url-shortener.me/6JVP

Introduction to Business Analytics

Completed a Business Analytics Certificate, covering data analysis fundamentals, data-driven decision-making, and interpreting insights using basic analytical techniques and reporting.

- Credential URL: https://url-shortener.me/6JWU

SKILLS

Technical Skills

- Programming: PHP, JavaScript, Python, Java, C++, C, HTML, CSS
- Frameworks & Libraries: React, Tailwind CSS, Bootstrap, Django,Luau
- Database Management: PostgreSQL, MySQL, Mongo DB
- Version Control: Git, GitHub
- Tools: VS Code, XAMPP, Postman, PyCharm, NetBeans, IntelliJ IDEA, Visual Studio

Analytical & Business Skills

- Business Analysis & Requirements Gathering
- Data Analysis & Reporting
- Problem-Solving & Critical Thinking
- Understanding of E-commerce Systems
- Process Improvement & Documentation

Soft Skills

- Leadership
- Teamwork & Collaboration
- Time Management
- Communication & Presentation Skills
- Problem Solving
- Adaptability & Continuous Learning

ACHIEVMENT

CYPHER 3.0 (Top 9)
Finalist in Cyper 3.0 – Inside Hacker's Mind, an inter-university data security hackathon at Kothalawala Defence University.

HACKATHON FINALIST
Placed 4th in the Cyberverse 2025 Hackathon (LNBTI) for strong problem-solving and creativity.

JASPER 2025 RESEARCH SYMPOSIUM
An IoT based Embedded System for Stress Detection And Relief Through Therapeutic Frequencies.

Leadership and enrollments
Recognized by LNBTI for leadership in the Robotics Club as Secretary and Treasurer (2024–2025).
